"CS399: Seminar Report"

Spring 2018

Department of Computer Sc. and Eng.

Indian Institute of Technology Patna

Abstract

Body of abstract (summary of contributions and/or results; approx. 1 line per page)

Keywords: " followed by 5 to 10 keywords and key phrases describing the content

0.1 Introduction

For the Seminar Report, you should understand an important issue in any area related to Computer Science. Nice if you tried to prove an extension of the existing work. You will write a report describing the research papers/ articles you read, what you tried to do, and any results, in the format of a conference paper. 4-6 pages length.

Give background on the topic (provide context and include references on prior work), justify your interest in the topic, prepare the readers for what they will find in later sections, and summarize (in a few sentences) the main findings and/or contributions. This section must be kept short about 1 t0 1.5 pages.

0.2 Contribution: Place a suitable name based on the contribution

About 1.5- 2 pages Body of the paper dealing with various aspects of the investigation as appropriate; e.g., theory, applications, design issues, tradeoffs, evaluation, experiments

0.3 Discussion

Here you write your views, comparisons with other methods or approaches. You should compare, criticize, and generally leave your personal mark on the paper. We analyzed the work in [1] in about 1 page.

0.4 Conclusion

Give a brief summary (in a few sentences) of what has been presented and/or accomplished. Emphasize the advantages and disadvantages of the proposed approach, technique, or design. Discuss possible extensions of the work and any interesting/open problem that you can envisage.
